1. Added 'en' to the [lang] attribute to enable screen readers to correctly read the page's content.
2. Added title with keyword to the <title> tag on both index.html and contact.html
3. To ensure text remains visible during webfont load by including 'font-display:swap' in @font-face
4. Replaced multiple <h1> tags on index.html with <h2>
5. Changed font color to white against darker background to increase the contrast
6. Deleted 3 <div> tags which contained keywords in font color that blends into the background
7. Added [for] attribute to the 4 form elements on contact.html
8. Replaced style.css with style.min.css
9. Compressed all images including the background images.
10. Deleted unused CSS to reduce the file size.
